***ANAEROBIC DIGESTION
SPECIALISTS***

AGRICULTURAL SOLUTIONS

CH-Four Biogas Inc. is a progressive developer of anaerobic digestion and biogas technology.

We provide sustainable energy and organic waste management solutions for farms, municipalities and industrial operations.

We have extensive experience in the planning, design and construction of specialized biogas systems. We specialize in co-digestion and the utilization of a wide-variety of feedstocks in the anaerobic digestion process

Our Services

- Preliminary Project Evaluation
- Feasibility Studies
- Feedstock Sourcing
- System Engineering and Design
- Project Administration
- Operational Support & Monitoring
- Anaerobic Digestion Simulation
- Permit & Funding Application Support

AGRICULTURAL SOLUTIONS

CH-Four Biogas Inc. specializes in the optimization of existing farm practices through the use of anaerobic digestion technology. Whether environmental or economical, a biogas system can help you achieve your goals.

Benefits of Biogas Systems

- Reduce odour by up to 97%
- Reduce pathogens by up to 99%
- Reduce greenhouse gas emissions
- Improve nutrient value of manure
- Offset fertilizer costs
- Offset livestock bedding costs
- Produce electricity and thermal energy
- Generate new source of revenue
- Support rural economy

Find out about your farm's **true** potential

Anaerobic Digester Kits

CH-Four Biogas Inc. offers containerized anaerobic digester kits to improve project economics while giving farmers the opportunity to manage their own projects.

Our kits contain all specialized equipment as well as a bill of materials for those items that are most cost effective to source locally.

Digester kits are offered in the following sizes: 500m³, 1000m³, 1500m³

For more information on CH-Four Biogas Kits, please contact us.
